

The MK Futures 2050 Commission published its 'Making a Great City Greater' report in 2016.

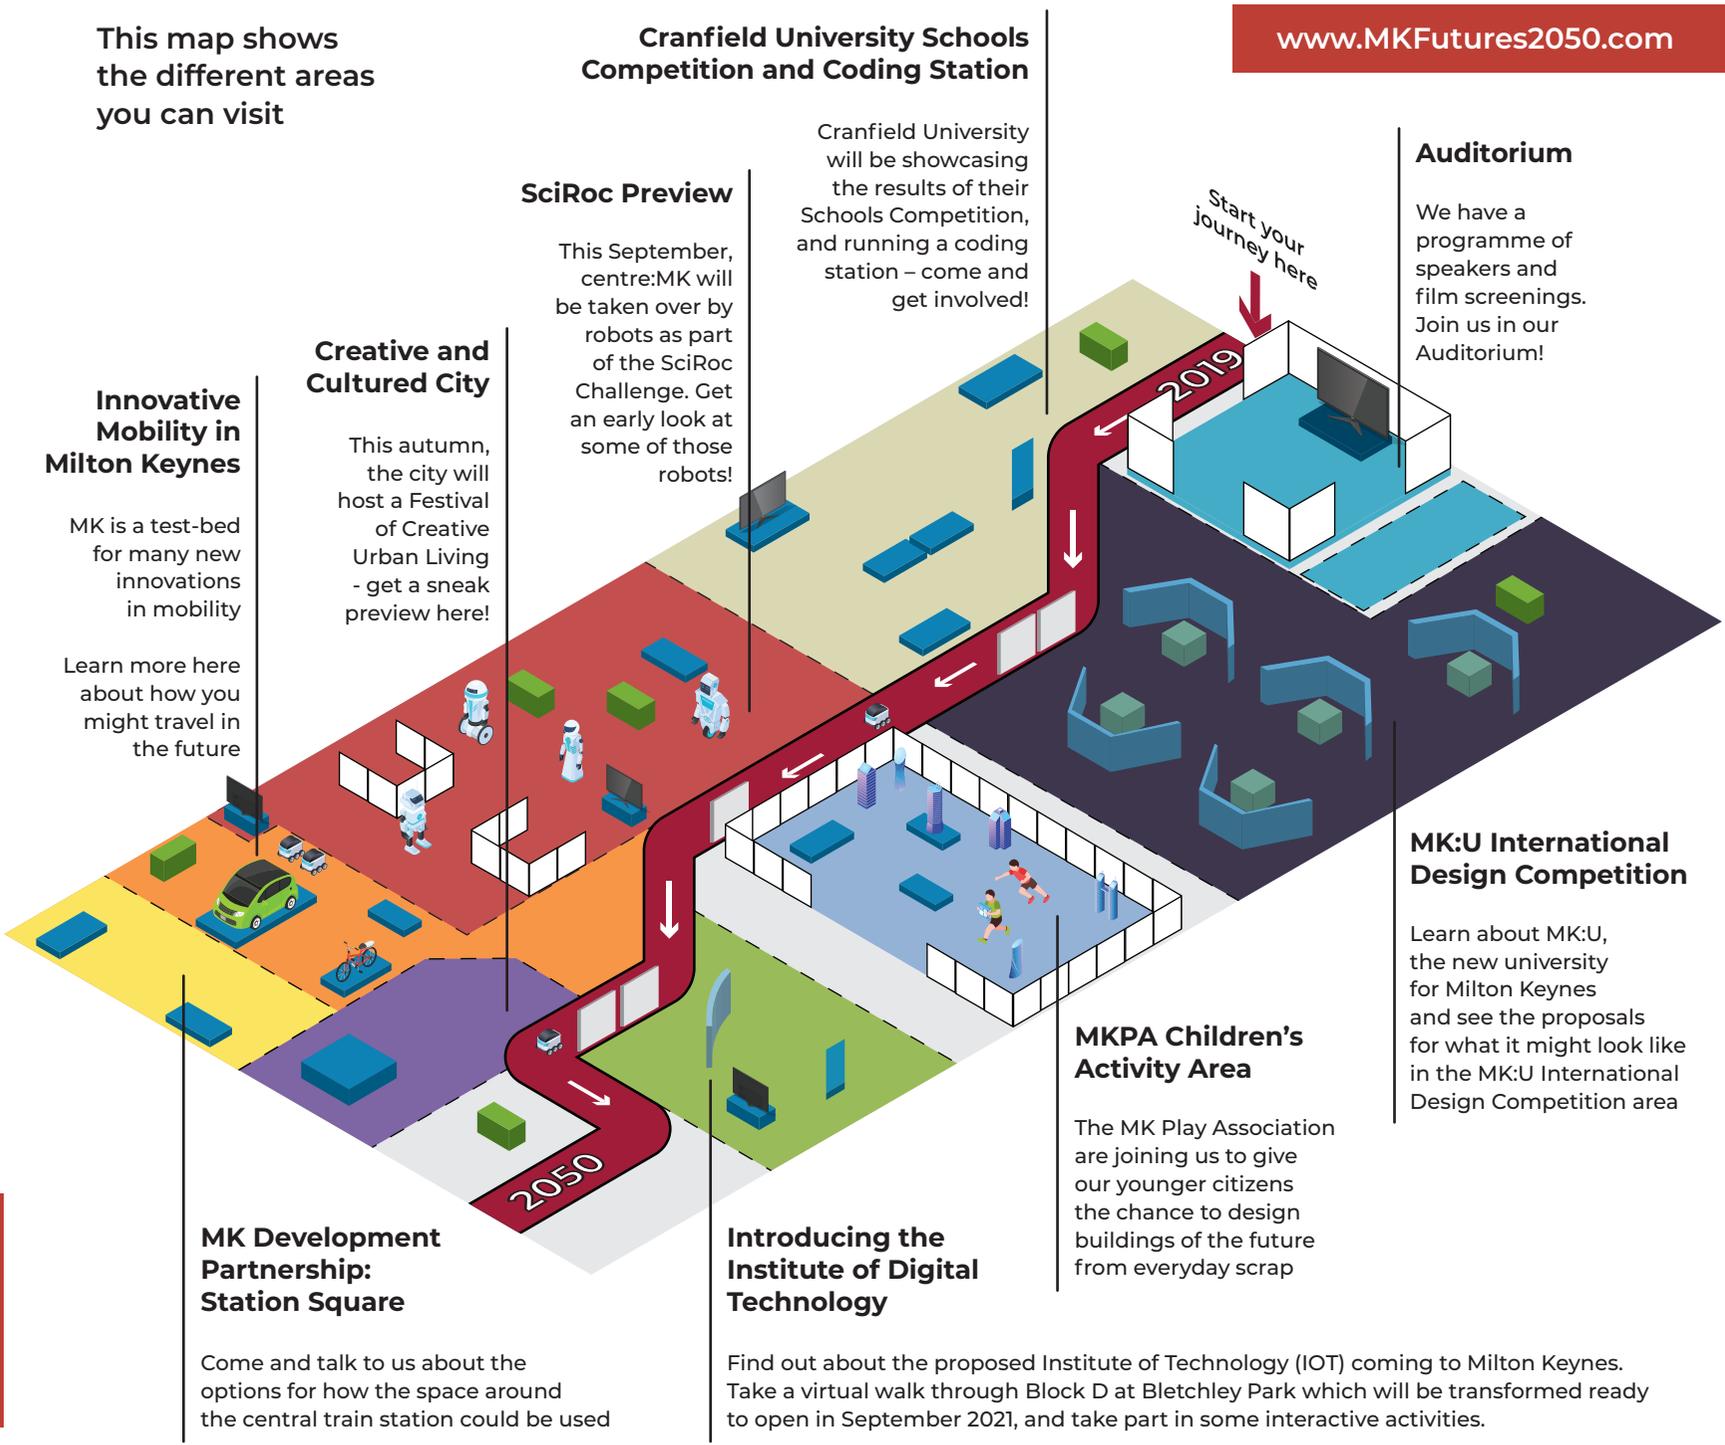

The report - which was supported and funded by Milton Keynes Council - recommended the delivery of Six Big Projects to secure the city's long-term success. Three years on, what progress has been made?

Walk around our exhibition to see what's planned for the future of Milton Keynes - including the shortlisted designs for the new university, MK:U.

Follow the Redway to 2050 and learn about the Six Big Projects, and the opportunity for Milton Keynes to continue to grow and prosper over the next few decades. Milton Keynes Council will be joined by lots of partners over the four-day exhibition.

Please note: we will be taking photographs and video footage throughout the four-day event. By attending the exhibition, you agree to us using any images in future publications.

This map shows the different areas you can visit

Innovative Mobility in Milton Keynes

MK is a test-bed for many new innovations in mobility. Learn more here about how you might travel in the future

Creative and Cultured City

This autumn, the city will host a Festival of Creative Urban Living - get a sneak preview here!
